EDUCATION

George Washington University

Major: Bachelor of Science, Data Science

Washington, D.C.

May 2025

WORK EXPERIENCE

D.C. Witness - Washington, D.C.

May 2025 - Present

Data Intern

- Queried key metrics with SQL from a database of 100,000+ rows of crime data covering Baltimore and D.C.
- Conducted a comprehensive data quality audit, identifying and categorizing errors across more than 2,000 rows to enhance database integrity by 22%

Endeverus Inc. - Remote

January 2024 - January 2025

Data Analyst - Growth Marketing

- Leveraged Python and SQL to analyze complex datasets containing customer interactions, extracting over 30 actionable insights that directly informed three campaigns targeting untapped customer segments
- Collaborated with stakeholders to model data from target demographic trends and top-performing features, resulting in a 28% increase in app users
- Created interactive dashboards in Power BI to visualize real-time resource allocation and key performance metrics
- Engineered and deployed an automated ETL pipeline from Google Analytics 4 and a REST API into PostgreSQL

Shoclef Inc. - San Francisco, CA

May 2020 - July 2022

Digital Analytics Specialist

- Utilized SQL, Excel, and Python to extract, clean, and manipulate global sales datasets to build a predictive model using logistic regression and integrated it into the company's admin panel for real-time reporting and advanced analysis
- Conducted A/B and multivariate tests, analyzed results, and implemented changes to improve user experience, decrease churn rate, and increase conversion rates by 28% in Asia
- Collected, processed, and analyzed digital data including Google Analytics, CRM systems, and marketing platforms to measure the effectiveness of digital marketing campaigns (PPC, SEO, email, social media)

PROJECT EXPERIENCE

Comparative Analysis for Local House Price Index Forecasting

Jan 2025 - May 2025

- Programmed and compared 5 forecasting models (ARIMA, Lasso/ElasticNet, SVR, LSTM), applying walk-forward validation methodology that achieved 15% better accuracy than benchmark forecasts
- Engineered time-series features from 9 economic indicators, performing data wrangling, stationarity transformations, and creating lagged variables, revealing key temporal dependencies in housing data
- Applied comprehensive data preprocessing for multi-frequency economic datasets, implementing imputation techniques and data visualization that improved forecast accuracy by 18%

Lumber Delivery Business Analytics (Open Avenues Foundation)

March 2025 - May 2025

- Modeled lumber delivery reschedule rates by analyzing 760+ daily operational records; engineered time-series features and validated an Elastic Net regression model ($R^2=0.41$ OOS) to extract key predictive drivers for performance
- Developed and analyzed key performance indicators (KPIs) for delivery efficiency, truck utilization, and rescheduling
- Translated results into actionable business recommendations focused on minimizing risk of rescheduling

TECHNICAL SKILLS

Coding Languages and Skills: Python, R, SQL, Excel, Power BI, Tableau

Tools & Libraries: Pandas, Numpy, Tensorflow, Matplotlib, Scikit-learn, ggplot2, Shiny, Tidyverse, Lubridate

Analysis Skills: Linear and Logistic Regression, XGBoost, Random Forests, Data Wrangling, Data Visualization, Machine Learning
